ALUMINIZED FIBERGLASS CLOTH STYLE 2025 / 9480

Glass lagging fabrics designed to replace asbestos. Used for removable blankets, pipe wrapping, turbine blankets, fittings, flange covers and engine exhaust pipes. Specifically designed for flange shield material by the U.S. Navy. Since it must meet Coast Guard Specifications, a very low percentage of adhesive is used. The fabric is heat cleaned to set the weave and reduce fraying when cut. This fabric is then laminated to aluminum foil to provide a vapor barrier.

PROPERTY DATA

Weight (o.s.y)	19.6
Thickness	.032"
Thread Count	20 x 14
Tensile Warp	200
Fill	100
Weave	Plain
Coating	Aluminum Foil

This style has been designed for continuous use at temperatures up to 300°F. It has been manufactured to comply with MIL-C-20079.
