NOTE *1: As manufactured continuous filament glass fibers are not respirable. Continuous filament glass products that are chopped, crushed or severely mechanically processed during manufacturing or use may contain a very small amount of respirable particulate, some of which may be glass shards. See Section 8 of Safety Data Sheet for exposure limit data.

NOTE *2: The specific chemical identity and exact percentage of concentration has been withheld as a trade secret and may vary per batch.
4. FIRST AID MEASURES

INHALATION: Move person to fresh air. See medical attention if irritation persists.

EYE CONTACT: Immediately flush eyes with plenty of running water for at least 15 minutes. If irritation persists, get medical attention.

SKIN CONTACT: For skin contact, wash with mild soap and cold water. Do not wash with warm water because this will open up the pores of the skin, which will cause further penetration of the fibers. Use a washcloth to help remove fibers. To avoid further irritation, do not rub or scratch affected areas. Rubbing or scratching may force fibers into skin. If irritation persists, get medical attention.

INGESTION: Ingestion of this material is unlikely. If it does occur, watch the person for several days to make sure that intestinal blockage does not occur.

5. FIRE FIGHTING MEASURES

FLASH POINT: N/A
FLASH POINT METHOD: N/A
UPPER FLAMMABILITY LIMIT: N/A
LOWER FLAMMABILITY LIMIT: N/A

FLAMMABILITY CLASSIFICATION: Non-flammable. In case of fire, glass fibers are not flammable, are incombustible, and do not support combustion. Binders, sizing, and finish can be combustible as well as any packaging material.

EXTINGUISHING MEDIA: Water fog, foam, carbon dioxide, or dry chemical

UNUSUAL FIRE AND EXPLOSION HAZARDS: None known

FIRE FIGHTING INSTRUCTIONS: Use self-contained breathing apparatus (SCBA) and full bunker turnout gear in a sustained fire.

HAZARDOUS COMBUSTION PRODUCTS: Primary combustion products include carbon dioxide and water vapor. Carbon monoxide, nitrogen oxide, and other unknown substances may exist in small quantities.

6. ACCIDENTAL RELEASE MEASURES

CONTAINMENT PROCEDURES: This material will settle out of air. If concentrated on land, it can be scooped up for disposal as non-hazardous waste. This material will sink and disperse along the bottom of waterways and ponds. It cannot easily be removed after it is waterborne; however, the material is nonhazardous in water.

CLEAN-UP PROCEDURES: Scoop up material and put into a suitable container for disposal as a non-hazardous waste.

RESPONSE PROCEDURES: Isolate area. Keep personnel away.

SPECIAL PROCEDURES: None.

7. HANDLING AND STORAGE

HANDLING PROCEDURES: Keep product in its packaging as long as practicable to minimize potential dust generation. Keep work areas clean. Avoid unnecessary handling of scrap materials. Wear PPE as described in Section 8.

STORAGE PROCEDURES: No special procedures.
8. EXPOSURE CONTROLS AND PERSONAL PROTECTION

EXPOSURE GUIDELINES:

A. GENERAL PRODUCT INFORMATION: Follow all applicable exposure limits.

B. OCCUPATIONAL EXPOSURE LIMITS:

*PNOC = Particles not otherwise classified

C. VENTILATION: General dilution ventilation and/or local exhaust ventilation should be provided as necessary to maintain exposures below occupational exposure limits.

PERSONAL PROTECTIVE EQUIPMENT:

RESPIRATORY PROTECTION: A properly fitted NIOSH approved N95 series disposable dust respirator should be used when high dust levels are encountered, the level of glass fibers in the air exceeds the occupational exposure limits, or if irritation occurs.

SKIN PROTECTION: Normal work clothing (long sleeved shirts and long pants) is recommended. Use gloves. Skin irritation is known to occur chiefly at pressure points such as around neck, wrists, waist and between fingers.

EYE/FACE PROTECTION: Wear safety glasses, goggles or face shield.
